Has anyone used a HP Thinkjet printer in conjunction with an AT&T-PC 6300 to obtain graphics output with programs such as DR DRAW or Overhead Express? Please let me know about your experience with this combination. Neither HP nor AT&T-IS nor Digital Research was able to give me a consistent answer.

The person who answered my question at DRI said NO. A HP sales engineer said it should work if it works with Epson printers and if the Thinkjet's switches are set for Centronics compatibility. AT&T-IS folks hadn't tried this combination and didn't have an answer.

Looking Forward to hearing from you,
Arun: homxa!xxajttx
