I finally got some time to update the server.

New at the Belgian ftp-site kurobox.serveftp.net:3021

```
*****
*   If a package should be corrupt, please contact   *
*                                                     *
*   nightowl AT scarlet DOT be                       *
*   or                                                 *
*   saka AT village DOT uunet DOT be                 *
*                                                     *
*   so they can delete it and put a good version here *
*                                                     *
*   Only with your cooperation this site can become good *
