From The Force.net ...

The Star Wars Saga To Be Released On 4K

Digital Bits is reporting that Disney will release Star Wars: The Skywalker Saga as a 9-film, 27-disc 4K Ultra HD/Blu-ray box set on 3/31/2020.

"All right, we'll have more to report tomorrow on The Bits, but I wanted to jump in here quickly this evening with word from retail sources that Disney will release Star Wars: The Skywalker Saga as a 9-film, 27-disc 4K Ultra HD/Blu-ray box set on 3/31/2020.

Here's the thing: We know for sure that Best Buy will have an exclusive SKU. What we don't know yet is if the entire box set is Best Buy exclusive, or if Best Buy will just have exclusive packaging.

But that obviously means Star Wars: The Rise of Skywalker will street on Blu-ray, DVD, and 4K Ultra HD on 3/31/2020 as well.

This set does not appear to include Solo: A Star Wars Story (which is already available on 4K), nor will it include Rogue One: A Star Wars Story, so Rogue One will likely be available on 4K separately that same day."
