Recently I activated the sign-in screen on my computer because I had guests staying at my house. Now they have left and I don't need it, but I can't figure out how to deactivate it and it is causing problem preventing me from using my TIVO from playing YouTube videos on my 55 inch TV. Apparently, the TIVO uses the account on my computer to access YouTube and because my computer is now password protected my TIVO is shut out. Watching YouTube videos on a 55 inch TV is much better than watching them on an itty bitty computer monitor.
