hey list,

can someone tell me what this is? who was it made by? what
does it do? thanks in advance, george

It's a flash card that lets you put up to 32 Megabits of PC Engine or
TurboGrafx games on it and play them in your console. It is made by Tototek and works
great(at least it did with revision 1.3 of the software... I cannot vouch for
the current version as they have messed it up in a couple of the past
revisions).
