Subject: Wanted: Turbo Booster (non-functioning video preferred)

Hey everyone,

I finally have all of the components I need to build an RGB circuit (from www.gamesx.com) for my Turbografx. However, this morning I took a ruler to the back of my 'grafx and noticed how little space there is between the back and the flimsy plastic cover.

Rather than have exposed circuit board flapping against the wind, I figured I would try to hack a Turbo Booster. Does anyone have a Turbo Booster (Plus or not) which they can sell or trade to me? I would actually prefer one with malfunctioning video (if audio is working, then I don't have to worry about that portion of the circuit). I hate chopping up perfectly good Turbo accessories!

Please let me know: mcukan@glycofi.com

Thanks!
Mike
