Earlier this (last?) year my kid brother received a cartridge for his TI entitled "Return to Pirate's Isle" or some such thing. After a month of serious gaming, he came to the conclusion that he was getting nowhere fast. He seems to be having a serious problem finding the goal in this clever adventure game. In fact, after he had tried out every command that he, I, or anyone else we knew, he found that he hadn't found much.

We attempted to look for the predecessor to this cartridge, without much luck since we figured that there may have been some relation between the two games that was highly pertinent to this one. What he would like now is some hints as to what to do or where to go or maybe even something like what his object is. The accompanying documentation is rather brief and non-specific. If anyone has this game or knows anything about it or even suggestions as to what to try, please send me a note via mail. The poor kid is almost totally exasperated with the cartridge and could use just a little bit of help.

Thanx in advance,  
Gerrit Huizenga
