Does anybody out there own a Leading Edge pc??? I can get a great deal on
one, but I dont know too much about the computer or its quality.

What I would mainly like to know is

 How is the quality of the machine. Does it break down??? If it does
 is it expensive to repair??

 What about service??? Is service easy to find for it?

I will mainly be using it for a terminal, word processing, and programming
(C,Pascal,LISP and BASIC).

Thank-you for any information you can give me,

Dan O'Connell
