I recently acquired a cartridge-based game for my Atari 400 entitled "Journey to the Planets" by Roklon Software. My question is a rather embarrassing one, but it's beginning to drive me crazy. . .

DOES ANYBODY KNOW HOW TO GET THE RUBY CHAIN BACK TO THE SHIP ???

I've figured out how to get my hands on the chain, but each time I pass through one of the monoliths, it vanishes !!! I have solved all of the other puzzles (planets), and so would be more than happy to trade for this information. Failing a solution, I would also be interested in comparing notes with others in the same situation. I have made some useful observations about this planet, and would like to exchange ideas with others who are currently trying to solve it.

Best Regards,
