Good afternoon.

When I was deciding to buy the VidHD card, I watched a lot of videos and saw a lot of different brands of displays.

I had an older cheap Elements 1080p tv which I am using currently with the card.

lacking.

Can I ask for manufacture and model number suggestions.

Thank you.

Leon Sargent

Hi Leon,

On the recommendation of John Brooks, I bought a Seiki 23.6" TV which works really well.

The specific TV I bought is this one:

<https://www.target.com.au/p/seiki-23-6-fhd-tv-dvd-combo-sc24-fdv/62078061>

I got it when it was on sale a couple of months ago for AU\$159 IIRC. The TV has HDMI, VGA, component, composite, and an in-built DVD player which I'll probably never use. I've tried the composite connection with my older Apple II's, but I think I only get a black and white image here. It works great with the VidHD and Nishida Radio DVI adapters for the IIgs though.

Overall, I am really happy with the display and build quality on this TV.

Cheers,

Mike

Mike.

Nice looking display. Seems it is branded for the European and Australian markets. googling for that display only gives me non US locations. I checked Ebay as well and those displays are 32" and higher. Too big for the space I have.

Thank you for the recommendation.

Leon

I have a couple of 27" HPs and a 22" Tatung TME22W that I got for free that all work well with the VidHD

I'm using a 32" hisense tv, it does a pretty good job, only trouble it 32" is pretty big... you need to sit well back from it. I'd like to find about a 15-17" 1080p monitor... (probably not going to happen)...

I ran across this display recently:

<https://www.seeedstudio.com/15-6-Inch-1920-1080-Full-HD-IPS-Touch-Screen-Portable-Monitor-p-4027.html>

I haven't yet pulled the trigger on it, but it's tempting. The smaller size is more "period-correct" for use with the IIGS (though it is still widescreen), it'd take hardly any space when put away, and it'd also make a nice second screen when I'm on the road (one-cable connection to my Dell Latitude 7370). At \$169, it's almost in "impulse-buy" territory.

Only slight drawback to that I see is no stand, but with that kind of size weight, it shouldn't be too hard to fit something up.

I'm looking for a portable display myself. Amazon has a few available at the moment. I don't know anything about these brands. Has anyone tried these?

Elecrow 10.1" - US\$111
<https://www.amazon.com/dp/B076GZVCP2>

Elecrow 11.6" - US\$128
<https://www.amazon.com/dp/B01NB17E0Z/>

Sunfounder 13.3" - US\$126
<https://www.amazon.com/dp/B07NNXH2SS>

Regards,
Andrew

Eyoyo 12" US\$129

<https://www.amazon.com/dp/B075CGZJLJ/>

In Australia,

Eyoyo 12" AU\$185

<https://www.amazon.com.au/dp/B07BFTHRCM>

Eyoyo 13" AU\$180

<https://www.amazon.com.au/dp/B07BXPC6JC/>

I bought this one. It is working with the VidHD. Happy so far.

The provided stand is pretty basic with metal edges, but it can be removed.

It comes with a mount and screws for using a monitor stand/arm and a wall mount.

Came with an HDMI cable and remote as well.

Regards

Andrew
