Incredible to see comments here since 1994 and it was already rumored that Bill Gates was the antichrist, now in 2021, ID 2020, that he already talks about a digital tattoo, "no one can buy or sell unless he has the mark of the beast" , creator of the Covid, vaccines for everyone, practically the control of the UN, GAVI, MONSANTO, and the recent news that he has quietly bought more agricultural land than anyone in the world, to manage food, the right to eat , the right to choose what they eat, to choose how it is grown, and to choose who grows it, and the control of the seeds, well, we could continue with more and more data.

Thank you for this trip down Usenet memory lane. This newsgroup is not about Microsoft, Bill Gates or religion however, and I suspect people writing about Bill Gates being antichrist in 1994 did so as a joke.
