Haven't bought from RM in a few years as I just started looking at my A2 machines after some time off, but are they still operational?

Not sure if the COVID situation has them closed or what, but placed an order a week ago and haven't seen or heard a thing.. tried calling and emailed a couple of times, also Facebook messenger - nada.

No real rush but was trying to ask if something was in stock, and it seems to be all radio silence over there. Anyone had any luck ordering from them recently?

Good to hear. Ordered some PSUs as well after a few years of letting my //e and IIGS languish.. Eager to get them rolling again. Thanks for the info.
