Originally posted by: kegs

I've updated KEGS, an Apple IIgs emulator for Mac OS X and Linux, to 1.13. The Mac executable should run on 10.13 or later. It's also a universal app, so it runs native on Apple M1 silicon. There's a Linux executable as well.

KEGS v1.13 is available at: <http://kegs.sourceforge.net>

The current CHANGES.txt file:

Changes in KEGS v1.13 since v1.12 (09/23/21)

- Better support for joysticks on Macs. Select Native Joystick 1.

Full source code is included. To rebuild on the Mac, all you need is to download XCode and KEGS, "cd src; make".

Kent
