Glaciers Visit Izatys Resort - Mille Lacs Lake, MN

Published on May 11, 2013 by Darla Johnson

Ice Heaves pushed up from Mille Lacs Lake onto the Resort grounds and damaged homes within 15 minutes. Date Taken: 05/11/2013 around 9:30 am

Glaciers Visit Izatys Resort After-Math

Note that physics-wise, there is nothing directly pushing the ice inshore. Wind that could push a wall of slush would be much more dire to witness, akin to having a hurricane-type bulldozer shove everything visible aside. Simple answer, barometric pressure-pumped supercooled water veins.

Published on Mar 9, 2012

Several boathouses on the eastern shore of Lake Winnebago are damaged from ice shoves and it could get worse this weekend.

YOUTUBE[Frozen Waves Invade Newfoundland, Canada] (December 23, 2010)

(Note? that these are not creeping up the frozen shoreline because the ground is frozen solid, which is very much different from the warm ground in Darla Johnson's video)

YOUTUBE[Ice Waves at North Beach]

What Darla Johnson captured on video was a VERY RARE occurrence of ice forming in a unique set of conditions. Unfrozen ground, liquid supercooled water, and high? wind pressures to pump it up the shoreline.

Ice shoves cause damage on Lake Winnebago shoreline - Friday, 09 Mar 2012

Video shot by Brett Petrie of Appleton shows just how fast moving the wall of ice can be. Petrie and his brother Brandon shot the video at their grandparents' home in the Town of Taycheedah.

"The crushing sound from the wood, all you heard was the snapping and you couldn't even imagine how many different sounds were going on when it happened," Petrie said.

People who live along the lakeshore say there is no stopping the massive wall of ice, you can see how it broke through this boathouse door leaving it in pieces as the ice continues its march inside.

"It happens fast," said Michels.

"All these piles were here just in the day time, I couldn't believe how quickly it changed," said Julie Petrie of De Pere.

The Petries say in a span of about 30 minutes the ice reached shore and broke through several boathouses. They say right now the contents can be saved, but they are worried what the wind will do this weekend.
