I am looking for information concerning a collection of educational programs written for the TI 99 Home Computer by the Minnesota Educational Computing Consortium (MECC). These disk based routines were essentially exercises in science and mathematics for grades 1 through 8. The titles of which I am aware include:

1. Metric and Counting
2. Elementary Economics
3. Elementary Math and Science
4. Astronomy
5. Word Beginnings
6. Exploring
7. Math Practice
8. Science Facts
9. Natural Science
10. Social Science
11. Teacher's Tool Box

If anyone has further information about these programs, and can either tell me where I might purchase some or may be willing to trade for some, please return mail to me. Thank you.
