Standard NULL-MODEM

The following table gives the connections for the standard NULL-MODEM as sold by most computer supply companies.

CONN-A CONN-B

1 1
2 3
3 2
4,5 8
6,22 20
7 7
8 4,5
20 6,22
22 4,5

This will work with most modem without modification. I use a Hayes 1200 and this. I have also used an ATT made by Penril that needs pin 20 (DTR) at the modem end tied to 6 (DSR) of the same end. Others I know who use various modems from acoustic couplers to direct connect use it one of two ways.
