Date-Received: Wed, 6-Mar-85 02:59:14 EST
Distribution: net
Organization: U of Waterloo, Ontario
Lines: 35

I am selling the following as one package to the best "reasonable" offer:

TI Mini Memory Cartridge

- 4K RAM, 4K ROM, and 6K GROM.
- Allows POKEing, PEEKing, and assembler language programming from TI Basic.
- Manual included.
- One year old (battery should still be good), used about three times.
- Includes the Line-by-line Assembler (plus manual) for assembling TMS9900 programs.

Assembler Language Primer

- written by John T. Dow (not TI - hence easier to understand).

TI Editor/Assembler Manual

- includes complete description of TMS9900 commands and many ROM routines.

Mail offers/queries/etc to me at watdaisy!gawilson, my hardmail address is

Graham Wilson
280 Phillip Street,
Building A3-133,
Waterloo, Ontario
N2L 3X1

Note: The Mini Memory cartridge originally cost me about \$140, and the TI E/A Manual about \$25-\$30 (both prices in Canadian Dollars). I am looking at a minimum of \$75 Canadian (the final sales price includes the cost of shipping it to you by registered mail).

Thanks.

Graham Wilson.
