I'm thinking of buying a PCjr. for family use - we have 12 yr.-old and 5 yr-old daughters. Use will likely be educational, word processing, recreational programming and a little work from the office's PC (when possible). I'm interested in any experience and advice from PCjr. owners, with respect to reliability, desirable software and peripherals, usefulness of BASIC provided with the machine, the IBM color monitor, etc. Thanks in advance and please mail responses.
