I have an Atari 400 and Atari's 835 direct-connect modem.
What I DON'T have is terminal emulator software for this
configuration. Atari recommends (or used to) their
TeleLink II cartridge -- however, since both the cartridge
and the 835 modem have been discontinued, I haven't been
able to find a TeleLink II (plenty of TeleLink I's around,
though).

Does anybody know of any other terminal emulator software
for the 400 that supports the Atari 835 DC modem -- or,
miracle of miracles, know where I can get the TeleLink II
cartridge ???

Here's hoping. . .

Contact ANTIC magazine....they have an 800 number you can get from information
and they have a PD disk for the 835 modem for $15.
