I'm not a dealer and I know commercialism is discouraged on the net but I thought I'd pass this deal on to you anyways.

I can get IBM PC and XT compatible computers at dirt cheap prices. These computers are made off shore and look very much like the IBM PC and XT. Same paint color and style. I have one and I've run Lotus 123, Flight simulator, Wordstar and lots of other programs at it and it works like a champ!. These computers don't have basic built into the firmware. You can get GW Basic that works fine and is Basica compatible. Here is the deal:

PC compatible computer (8 slot):

Keytronic 1550 keyboard (PC compatible)
128K
2 360k half high disk drives with controller card
color grahics card.
Printer card.
Serial card.

\$ 1655

With RGB hi-res (640 x 500) monitor.

\$ 2055

XT compatible computer (8 slot)

Keytonic 1550 keyboard (PC compatible)
128k
2 360k half high drives with disk controller card
10 mb hard disk with controller card (built in)
Color graphics card.
Printer card.
Serial card.

\$ 2450

With RGB hi-res monitor.

\$ 2850

I don't stock them. With an order I can get what you want in 7-10 days.
Calif residents have to pay 6% sales tax.

I don't know how long this will last. If your interested mail direct to
me and give me a night time phone number and I'll call you.
