Subject: interesting finds in tokyo

hey List,

hope everyone is doing well this holiday season. i went on a bit of a shopping spree in akihabara the other day and found a bunch of interesting things. i was surprised to find, for only the second time ever, the pc-fx ga DOS and PC98 versions for sale- in the same shop no less. also forthe pc-fx, i found the tengai makyou game (kabuki clash, i think) going for \$90! yikes, when did this game become rare. other goodies like zenki and zeroigar still command a pretty penny also. but the find of the day came in the town i live in in nerima ward where there is a little old used video shop. i picked up an episode of a show called game tv which has lots of reviews of famicom, mega drive, neo geo, and of course, pc engine games. this volume is from may - june 1990 and is pretty good. is anyone interested in this for their website or anything? there are about twn pc engine games reviewed. splatterhouse is featured as is a racing game called power glide (or something like that). it looks like a kind of outrun-victory run hybrid with strange graphics. but, it got a good score. let me know if you are interested.

regards, george

The games included with the system, Kisado and PCE-Pro32M are:

9 imports:

6 HuCard only: Two are Space Harrier and Dragon Spirit. I don't have time to look the others up.

3 with case, book and sleeve: Cyber Core, Dead Moon and Fighting Run.

2 domestic:

Alien Crush: In case with book, no sleeve.

3-in-1 Gate of Thunder disk... no case. I will put it in a cd-rom sleeve.

Please email me at your earliest convenience if you're interested. I am preparing to place this lot on eBay but wanted to offer it to the list first.
