The Baltimore Heath Electronic Center is planning to replace the H89 and
10 MegaB Hard Disk with a H100 and a 20 MegaB hard disk. They are experiencing
some difficulty installing ZCPR3 on the H/Z100. This is one of the finest
BBs in the country and will only get better with this change.

Has anyone out there installed ZCPR3 on a H/Z100? If so you can respond
directly to me at 'eboyd@brl' or 'eboyd@apg-1'.
                          Thanks,
                          Earnie
