   Re: PAT700V1.ASM bugs?

   Thanks for checking out that patch file. Indeed, the copy of
   MODM700 that I had (dated as of 11/04/84 - same date as current
   file) was different and was off by 5 bytes in a number of
   locations. I have fixed up the file and it should be now correct
   as PAT700V2.ASM. It will be in GUEST1 at MC as usual. This one
   contains the correct addresses to match the MODM700 at SIMTEL20.
   I thought that we were done with different releases under the
   same release number.

There have been no changes to MODM700.AQM or MODM700.LBR since its
release on November 4, 1984. Where did you get your copy? The one on
Simtel20 hasn't been touched, according to WDIR's display of the
creation date.

Filename   Type Bytes CRC

Directory MICRO:
MODM700.AQM.1   COM 104320 8B0AH
MODM700.LBR.1   COM 71936 0477H
