I have just bought two new adventure games, Amazon and Farenheit 451, by Trillium software. They are great games, four sides each, a mixture of text and hi-res, and a big parser (not as big as Infocom's, but big.)

I would like to back them up, although there is no writing to the disk, I feel as though one side is going to go if I don't back them up.

Does anyone know the parms for them using Locksmith, Nibbles Away II, E.D.D., or Copy II + ? If you do, please either leave me mail, or post them for others to use also.

Thanks,  
Andrew Rahme.
