We desperately need a copy of Xenix for the PC/AT, the real version that is. Our local distributors here in Holland don't seem to know the difference between a wooden shoe and a floppy disk, and mention the month of July 1985.

We need it sooner than that. We have the money, and need it fast.

My telephone number is +31 40785051.
Expenses will be reimbursed generously, if you can get us the copy soon.
