Subject: Cross Assemblers

Bernie, do you have any available cross assemblers for Motorola 6800 and 6809 MPUs that run under CP/M? I've seen public domain types (a la LASM) out in the free world before, but I don't remember where. I haven't seen one here, but then I never am sure I'm looking in all the right places on this machine. Anything you might have stored here would be of considerable help -- I don't really want to buy some if I don't have to.

Thanks,
Hal Hostetler
