One of our SIMTEL20 users has reported that there is some garbage in the file CC11.CQ of library SMC-SRC.LBR in the directory MICRO:. He says "I'm not a C programmer but the garbage seems to be inside a comment and may not be serious."

Rather than try to figure out if there is any damage, I would appreciate getting a fresh copy of that file if anyone has it. Please don't send it by netmail - just let me know if you have it someplace accessible on the net and I'll make arrangements to get it.

Thanks!
