Hi--
You can readily relocate Plu*Perfect Systems' CP/M 2.2E
to be compatible with the Micro-cornucopia Kaypro II rom.

A 63.00K 2.2E system will run DateStamper and 4 quad-density
drives with that rom. If you don't have DateStamper (you should get it!)
you can go up to 63.75K.

CP/M 2.2E disk versions K-1C or K3-A and later are needed to
support this relocation. Upgrades are still $5 plus original disk.
Check with Ed at Plu*Perfect (714-659-4432) for further details.
