[The Sleeper has awakened!]

I am looking for info on the above mention system that the Electronics Department at my school has just aquired. We know almost nothing about what it ran/runs. It was donated by a Law Firm that used it for word proccessing and some accounting. It is believed to have run some version of CP/M. We don't have any software or even a bootable disk for it. Would someone who has had some experience with or has any idea of where I can find some info on this beast?

Michael Cooper
