They haven't checked up on lately if they still think you look "schlumpy". You're not nearly as chubby as when you did the Rolling Stone article way back in 2003.

There is no evidence, anywhere, that penis size is strictly related to what race a person is. In fact, it appears to have nothing to do with it. The origin of this myth, too, is a total bummer. Big dick expert, black guy, and social commenter Scott Poulson explains:

.the notion that the black man had a "desire to conquer pristine Southern white womanhood" was concocted to ease the guilty consciences of white slave masters who routinely forced themselves on heir female slaves. In their minds, the black man, out of revenge, would do the same thing to white women if given half a chance. So the myth of "big dick-ness" was invented to control the sexuality of the black male by casting him as a "sexual terrorist."

In fact, the biggest penis in the world belongs to a schlumpy, white guy from Brooklyn named Jonah Falcon.

Are there any other myths you've heard that need to be debunked? Leave them in the comments!

Before you disparage these so-called sex myths, you should consider the economic consequences:

That pic in Rolling Stone is so fucking misrepresentative.
