"Corn spy? I've been called a lot of things in my life but never a corn spy" from mst3k Hellcats, in response to the mumbly type speech in that movie.

For some reason I found this line unrelievably hilarious.

I'm also still amused that there is a book version of the Hellcats movie and that I'm reading it, about a third or so through now. There are so far only minor plot differences, and the book is interspersed with verbal pornography. The movie is better, the book's too wordy, too much exposition. One plot point is that Linda and Monte have a go at it and Rita watches. Scorpio the drug contact in Mexico is more threatening in the book but at the same time is more of an ogre in the movie, with his drug-teasing. Maybe I should check out if there's a novelized version of Wild Rebels or a Sidehackers novel in print.
