   Following this message will be the last 4 files to EGAD, the Gadget
editor.   I hope everyone got all the files,   If not,   I can re-post
some of the modules if the others don't mind.

  For those who sent me empty diskettes,   I have not forgotten you.   I've
been working 8am to 1 am every day, and don't get home from work till about
1 am, I hope to have some time later this week to finish copying the EDAG
onto your diskettes and mailing them back.   Now, the bug reports should be
coming in soon.

  I will be handling the bug reports in the following way:
1. I recieve them via Email, and compare with the others.   If the same
    as earlier bugs, they will get assigned numbers for reference.   I will
    collect them.

2. After collecting them, and assigning numbers, I will post them on the
    net and assign people who volunteer to fix them.   I will also isolate
    which module I think it's in, and lock the appropriate modules.

3. After I get enough of them, I'll post them on the net so others will
    benifit.   I'll also include "work-arounds" if possible.

   PLEASE PLEASE report bugs to me. You can Email them to the following
net address below.   Do NOT post them on Usenet.   It would better utilize
Usenet if I post only ONE posting every week or 2 weeks, and make for less
traffic on Usenet.
