    Hi everyone. Just thought I would give all of you the current
state of comp.sources.amiga. Due to a problem in our news software, I
am currently unable to post to the sources group, but do have a number
of sources back-logged. As soon as the news software is fixed, I will
be releasing a number of source and binary files that may or may not
have been already posted to this group. This should start happening
fairly soon and you should see alot of sources being released over a
period of time.
    I am keeping the archives for comp.sources.amiga up to date on
j.cc.purdue.edu (asc.purdue.edu) up to date however at the suggestion
of some of you on the net. Because of this, I would like to request
that those who are posting to this group, to be sure to also send your
sources to me, or they will not be archived in this sources archive.
Because of some problems we are having with some of our news feeds, I
would rather you send me these via mail to make sure they get through.
    I want to thank all of you for your patience with this situation
and I would like you all to know that I am doing my best to get the
situation remedied. If those of you on the ArpaNet have not checked
the archives on j.cc.purdue.edu recently, you may want to take time
out to do so.
    Thanx once again,
 Craig Norborg
 comp.sources.amiga moderator
