Hi,

Would anyone here know of a good source for chips for the Commodore 16/116 ?

I'd specifically need two TED 8360 chips and one PLA chip (82S100, P/N 251641-02). Lowest price possible and in working condition, of course :)

Thx :)

P.S. : I'm located in France, so a European source would even be better...
