The two-hour movie version of the series will debut at 9 p.m. on Feb. 10 on Syfy, featuring additional footage and scenes that were not included in the web episodes. Shortly after the TV premiere, the film cut will be released on DVD, Blu-ray and video-on-demand services on Feb. 19. Set during the first Cylon War, Blood and Chrome followed a young William Adama (Luke Pasqualino) and a small team sent on a dangerous secret mission deep into Cylon-occupied space. So how did you like this? I would love to hear thoughts on this?

I am on a classic BSG group called "Colonial Fleets"

<http://www.colonialfleets.com>

And there I had this to say:

I liked it, and for these reasons:

- 1) Action.
- 2) Vipers.
- 3) Classic Cylon raiders.
- 4) Different characters (not a retelling.)
- 5) Adama was still idealistic, which gave it the idealistic tone of TOS.
- 6) Husker and Coker... some of that fun TOS Apollo and Starbuck banter.
- 7) You get to see more Battlestars.

- 8) The show is about how the humans win... for a change.
 - 9) Prototype Six was very 80's Sci-Fi art concept interesting.
 - 10) Liked the dogfight between Vipers/Raptors and Raiders over the ice planet.
-
