Summary:

Hi!  
A friend asked me to post this ...

WANTED

An S-100/IEEE-696 graphics board either bw or color with resolution comparable to that of an Apple etc. Does anybody out there know of such a product ???

Thanks,

Harry Reed

Viasyn (formerly Compupro) and Lomas Data Products advertise IBM PC workalikes designed to allow PC software to be run in S100 systems. I have no knowledge of them other than reading the ads.
